#61 [Critical CVE] CVE-2026-126173: The AutomatorWP Pro plugin for WordPress' webhook addon is vulnerable to authorization bypass in all versions...

MEDIUM

Date: 2026-11-14 06:46
UUID: CVE-2026-126173
Source type: Vulnerability database

Description: The AutomatorWP Pro plugin for WordPress' webhook addon is vulnerable to authorization bypass in all versions up to, and including, 1.4.4. This is due to the plugin not properly verifying that a user is authorized to perform an action. This makes it possible for unauthenticated attackers to reset the password of any WordPress account, including administrators, resulting in full account takeover. This is only exploitable when an administrator has configured an automation pairing a Receive Webhook trigger — with an 'Is the user ID' field — to an Update-User action whose User ID field is left blank and whose Password field is mapped to the webhook password tag, which is a documented, supported plugin configuration.

Other — affected_products: AutomatorWP Webhooks 0 ≤1.4.4 · aliases: CVE-2026-126173 · assigner: Wordfence · cvss_score: 9.8 · cvss_vector: CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:H · vendor: AutomatorWP

Severity: Medium (score 35: Critical CVE · CVSS 9.8)

#173 [Ransomware] K&A Industries (interlock)

Actors: interlock
Country: USA
UUID: SyZBIEluZHVzdHJpZXNAaW50ZXJsb2Nr
Source type: Ransomware leak-site tracker
Victim: K&A Industries
Victim site: kaindustries[.]com

Description: K&A Industries is a "secure identity architecture" company that manages the entire authentication lifecycle for government and enterprise clients. As a result, their own security weaknesses led to the compromise of sensitive personal data, biometric templates, and government contract data. K&A also provides PIV credentials to government agencies, such as the Los Alamos National Laboratory, which involves processing the personal data of federal employees. A breach of this data would trigger a cascade of legal, financial, and operational crises, leading to breach notification obligations under GDPR/government regulations, multimillion-dollar fines and class action lawsuits, loss of government contracts/CMMC status, and physical data breaches using cloned credentials at client sites.
